Pentravan®

DESCRIPTION

Pentravan® is an oil-in-water emulsion that uses liposomal technology to provide transdermal delivery of medications. It is a true vanishing cream, providing a highly elegant skin feel while providing the effective delivery of medications through the skin which was first introduced in PLO Gel.

Pentravan® vanishes into the skin as it enhances penetration of the medication and does not require an occlusive dressing unlike PLO gel which leaves a sticky residue on the skin and for which an occlusive dressing is recommended to prevent medication transfer to other people or clothing.

Therapeutic compliance should be improved over the use of PLO Gel.

CATEGORY

Highly elegant vanishing cream using the same proven penetration enhancers as PLO gel.

INGREDIENTS

Fatty Acid Alcohols, Acids, and Esters
Phospholipids
Antioxidants

Skin-feel Enhancer
Natural Humectant

Natural Preservatives
Nonionic and Anionic Emulsifiers
Buffer

QUALITIES

- An oil-in-water vanishing cream base containing liposomes from highly enriched soybeans.
- Water washable.
- Contains a proven preservation system.
- Enhanced penetration capabilities.

TECHNICAL DATA

Description: Stiff, yellow cream; slight odor of lecithin
pH: 4.0 – 5.5
Yield value: 40 – 150 Pa.
Shelf life: 3 years

SAFETY DATA

All ingredients have been generally recognized as safe by the USFDA when used in accordance with their intended purpose.
